Basic Template

```
#include <bits/stdc++.h>
using namespace std;

#define ff first
#define ss second
#define all(x) (x).begin(), (x).end()

int main() {
   ios_base::sync_with_stdio(false);
   cin.tie(nullptr);

return 0;
}
```

Sublime Build

Vector Operations

```
// Input vector
 vector<int> v(n); for(int i = 0, i < n, i++) cin >> v[i];
  // Print vector
 for(int x : v) cout << x << " "; cout << endl;</pre>
 // Common operations
 v.size();
                               // Size
 v.empty();
                               // Is empty?
v.push_back(x);
                               // Add to end
11 v.pop_back();
                              // Remove last
                              // Erase at index i
v.erase(v.begin()+i);
v.insert(v.begin()+i,x);
sort(v.begin(),v.end());
                              // Insert x at index i
                              // Sort ascending
sort(v.rbegin(), v.rend()); // Sort descending
16 reverse(v.begin(), v.end()); // Reverse
*min_element(v.begin(), v.end()); // Min element
*max_element(v.begin(),v.end()); // Max element
19 binary_search(v.begin(),v.end(),x); // Check if x exists
20 lower_bound(v.begin(),v.end(),x); // First >= x
upper_bound(v.begin(),v.end(),x); // First > x
```

Set Operations

Map Operations

```
map < string, int > m;  // Init map
m[key] = val;  // Add/update key-val
m.count(key);  // Check if key exists
m.erase(key);  // Remove key
for(auto &p: m) cout << p.first << ":" << p.second << endl; // Print
map</pre>
```

Common Algorithms

```
// GCD
2 long long gcd(long long a, long long b) { return b ? gcd(b, a%b) : a;
  // Sieve of Eratosthenes
  vector < bool > isPrime(n+1, true);
 void sieve(int n) {
      isPrime[0] = isPrime[1] = false;
      for(int i=2;i*i<=n;++i)</pre>
           if(isPrime[i])
               for(int j=i*i;j<=n;j+=i)</pre>
10
                    isPrime[j] = false;
11
12
13
  // Factorial
 long long factorial(int n) {
      long long res = 1;
      for(int i = 1; i <= n; i++) res *= i;</pre>
17
      return res;
18
19
  // Sum of digits
22 int sumOfDigits(long long n) {
      int sum = 0;
23
      while (n > 0) {
24
           sum += n % 10;
25
           n /= 10;
26
      }
      return sum;
28
29 }
```
